15. Remarks: Applicant wishes to change the point of diversion and place of use to a new undeveloped area. Applicant has reduced the amount of cultivated acreage at the original farm site by utilizing low-volume circular sprinklers, resulting in an overall reduction of water usage. Applicant wishes to place an additional 3,300± acres of land, approximately 8 miles southeast of the present farm site, under cultivation utilizing 58.274 cfs of water from 38 existing permits to irrigate the proposed place of use. This permit to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 30593, Certificate 9590, is issued subject to the terms and conditions imposed in said Permit 30593, Certificate 9590, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

6,448.17 acres total

Item 15.

Applicant has reduced the amount of cultivated acreage by installing low volume circular sprinklers. This, coupled with an increased efficiency and innovative irrigation techniques, has resulted in a decreased water usage at the present farm site. Applicant wishes to place an additional 3,300 acres of land, approximately 8 miles southeast of the present farm site, under cultivation. For more detailed information on this project, please refer to the February 1999 report prepared for Winnemucca Farms by Cascade Earth Sciences, Ltd. which, by reference, is made a part of this application.
